F. O. CHAMBERLIN
Gladiolus Specialist

JORDAN - - - NEW YORK

★ It is with great pleasure that I can greet you once again with a catalogue of gladiolus bulbs, which I hope and trust will be instrumental in bringing something of joy and comfort to you in these times of great tribulation. A victory garden is OK and in my opinion will do more to win this war than many of the regulations and handicaps imposed on those who produce food for the nations.

I don't believe there ever was a time when the need was greater for something of beauty to cheer and stimulate the souls of mankind than now. Try a few glads in your victory garden and see how much easier it is to get a real interest in gardening. We regret very much that there will be thousands of our former customers that will not receive this catalogue, because of the fire that destroyed all of our lists and records. You can help us a lot by sending us a few names of those you know who are interested in growing a garden of beauty.

Yours for a complete victory,

F. O. CHAMBERLIN.

Orders for Less Than \$1.00 Must Be Accompanied by Sufficient Postage

The different sizes will be designated as follows: L for large, M for medium, S for small, and Blts. for bulblets. Large and medium bulbs are always of blooming sizes and many of the small ones will bloom and will make the best of bulbs for the next season.

I would mention that there are a few varieties that do not make very large bulbs. M size, in other words, would be a good size for a few of these varieties.

That does not mean that these varieties may not be very choice. I happen to know that the sweepstake spike at the State Show at Rochester in 1937 was produced from a bulb of but little more than 1 inch in diameter.

To avoid disappointment you should get your order in reasonably early, especially if you are going to order some of the newer varieties, as many of these are limited in quantity. *We will accept your C. O. D. order for future delivery.* We do not substitute unless we give better value. In the case of late orders we may have to substitute or return your money. Which would you prefer?

All orders of \$1.00 or over will be prepaid anywhere in U. S. A. I am giving no discounts on these prices but I do try to give all customers a pleasant surprise. Of course, we can give wholesale quotations on large lots. Please send list of just what you want for estimates. *The larger your order, the more extras you will receive.*

Quotations are usually made three at the dozen rate, as we cannot afford to put up single items for less than 10c. So you get the benefit of the dozen rate whether you order three, six, nine, or twelve. Where priced singly, multiply by 10 for dozen rate.

Our prices are as low as consistent, quality considered. There is just as much difference in glad bulbs as anything else in the line of seeds you may buy. This does not mean that you must pay exorbitant prices for good bulbs. Our bulbs are as good as you can buy at any price. One of the greatest mistakes the average buyer is liable to make is to purchase bulbs that have been forced to the limit in order to make a grand display. Such bulbs seldom repeat. I have a great many customers tell me that their flowers were better than mine. I figure that it is a better recommend than to have them say that they could not get as good flowers as I showed them. Of course, you may grow a poor crop from good seed, but you cannot produce a good crop from poor seed.

OUR GUARANTEE

If, upon examination, bulbs are not satisfactory, return them and your money will be refunded. Our guarantee does not mean that we are in any way responsible for any failure due to weather conditions or insects. However, if you have any complaint at blooming time just send it along to us and we will try and do our part.
